FUNCTION: RESPONSIBLE FOR THE DEACETYLATION OF LYSINE RESIDUES ON
THE N-TERMINAL PART OF THE CORE HISTONES (H2A, H2B, H3 AND H4).
HISTONE DEACETYLATION PLAYS AN IMPORTANT ROLE IN TRANSCRIPTIONAL
REGULATION, CELL CYCLE PROGRESSION AND DEVELOPMENTAL EVENTS (BY
SIMILARITY). IN DROSOPHILA, IT IS INVOLVED IN POSITION-EFFECT
VARIEGATION (PEV) AND IS DIRECTLY INVOLVED IN COUNTERACTING
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            SUBCELLULAR LOCATION: NUCLEAR (POTENTIAL).

HISTONE DEACETYLATION PLAYS AN IMPORTANT ROLE IN TRANSCRIPTIONAL REGULATION, CELL CYCLE PROGRESSION AND DEVELOPMENTAL EVENTS.

-II- FUNCTION: MAY PARTICIPATE TO THE REGULATION OF TRANSCRIPTION THROUGH ITS BINDING MITH THE ZINC-FINGER TRANSCRIPTION FACTOR YYLLINCREASES YYL REPRESSION ACTIVITY.

-II- SUBBURIT: FORMS A HETERNOLOGOUS COMPLEX AT LEAST WITH YYL.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            MEDIINE-99162406; PubMed-10051405;
